DETAILED ACTION

Allowable Subject Matter

1. Claims 12, 15-24, 27, 28, 30-32, and 35 (renumbered 1-17) are allowed.
2. The following is an examiner's statement of reasons for allowance: Savage (WO 99/11476) is seen to constitute the closest prior art of record. As best depicted in Figures 1 and 3, Savage is directed to a runflat device comprising a plurality of arcuate segments 12, 14 having flanges 24, 26 that overlap one another in the circumferential direction and a first and second clamping bolt 28, 62 that pass through a pair of spaced holes formed in said flanges. The reference further teaches that the run flat device of Savage further includes two captive nuts or fastening nuts 60. While Savage fails to include a retaining plate, Tansei (US 5,141,039) specifically teaches a similar clamping assembly in which a retaining plate or element 18 is positioned on each side of said segments in order to reinforce the thinner portions (flanges) of said segments (Figure 3 and Column 3, Lines 65+). As such, it would have been obvious to include a retaining plate in the runflat device of Savage. However, in such an instance, the captive nuts are not located within the first and second holes (they are located on the outer peripheral surfaces of the respective wedges) and one of ordinary skill in the art at the time of the invention would not have found it obvious to modify Savage and Tansei in accordance to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
